

Note:

On the project being discussed below Buzz Calek was the Project Manager at J. L. Malone's home office and Dave Raymond was the Project Superintendent in the field. The project was for modifications and additions to an energized electrical Substation at the Kennedy Space Flight Center in central Florida.

Subject: FW: CONGRATULATIONS - STS-124 Space Flight Awareness Launch Honoree

Buzz & Dave,

I recently was appointed the Space Flight Awareness Launch Honoree for the upcoming flight of STS-124, for my work on the Orsino project. I want to take a minute to let you know that if it wasn't for your flexibility and commitment to quality on this project which allowed me to pursue the coordination efforts of all the parties involved, this award wouldn't have happened. It was a real pleasure working with your company and some how we overcame the numerous obstacles that presented themselves over the course of this project.

Your company and your crew presented themselves as a quality contractor with the satisfaction of your customer (NASA) in the forefront no matter what obstacles were presented, even under the time restraints of operating in an Outage configuration.

Once again I thank you and good luck on your future endeavors.

Don Hainsey
